

# **sport** **world**

## **Enter the world of Scalextric Internet Racing**

- Compete against Scalextric users from around the World using the unique Scalextric Sportworld Internet server
- Sportworld offers advanced race management functions which can also be applied to conventional Scalextric racing with no need to go on-line or attach to a PC
- Use Scalextric Sportworld to link your layout to a PC and then to the Internet for global competition
- Compete on your own layout against other racers with identical layouts in a virtual race which the Sportworld software then renders real
- Follow your progress in a race or spectate on other races via:-
